included 9 boxcars on 16 February	

25X1

activity was observed on 12 February. Between 11 a.m. and 11 p.m. on 13 February, there was continuous air activity at the field. 5. On 9 February, almost all the workers of the construction project were sent home because clearing work and construction work on the northern fuel dump had to be stopped as there was too much snow and frost. The laborers did not work for one week but received 60 percent of their pay. The billeting equipment of the workers was dispatched to Birkenwerder and brandenburg. 5. In February the spur track to the new ruel dump extended about 20 meters north of the elevated bunker. South of this bunker and west of the fuel dump there was an ammunition dump in a brick building about 4 meters high, which was guarded throughout the day and night. 6. Comment. An airfield is under construction near Schorf. heide. The bypass between Birkenwerder and Wustermark is a section of the northern ring around Berlin and near Brandenburg a connecting curve is under construction. 7. Comment. Major Tskhurbanov was observed as construction superintendent in Verneuchen in May 1952. This is the first information that he was observed in Schorfheide Tskhurbanov was erroneously			
off heading west. The planes which took off at regular intervals returned to the field after some time. Between 1 and 2 p.m., on 11 February, three or four take-offs were made by jet bombers which climbed into the clouds shortly after the take-off. 25. activity was observed on 12 February. Between 11 a.m. and 11 p.m. on 13 February, there was continuous air activity at the field. 5. On 9 February, almost all the workers of the construction project were sent home because clearing work and construction work on the northern fuel dump had to be stopped as there was too much snow and frost. The laborers did not work for one week but received 60 percent of their pay. The billeting equipment of the workers was dispatched to Birkenwerder and brandenburg. 5. In February the sour track to the new ruel dump extended about 20 meters north of the elevated bunker. South of this bunker and west of the fuel dump there was an ammunition dump in a brick building about 4 meters high, which was guarded throughout the day and night. 6. Comment. An airfield is under construction near Schorf-heide. The bypass between Birkenwerder and Wustermark is a section of the northern ring around Berlin and near Brandenburg a connecting curve is under construction. 2. Comment. Comment. As compared with the last reported status of 2 March, coal	25 X 1
stocks again increased by 26,213 tons which included about 10,000 tons of hard	
coal, and totalled 155,714 tone. According to the present daily coal con-	
surption quote of 20.960 tons. total coal stocks represented 7.4 days' re-	
quirements. It appears that the increased coal	25 X 1
imports from Foland are easing the critical coal situation, although total	
coal stocks are still insufficient.	25 X 1
of leaded cars decreased considerably, probably as a result of smooth	
operations. The number of damaged cars remained about constant. The number	
of operational cars for the first time remained above the prescribed target	
of 100.000 units throughout the reported period
